'**Natural High**' is the stunning debut single from **KayJay** - a head nodding expression of nostalgic, retro, summer vibes which really do take you back to an era when music was all about the feel-good factor. A funky bass line with an old school groove punctuated by uplifting brass and topped off with smooth, silky and soulful vocals. Perfect.

The soulful, acid-jazz infused original mix lends itself perfectly to the remixes by some of the hottest names in the world of dance;

**#Soulshaker** - Hot off the back of their recent #1 Chart Position in the US **Billboard** charts and dozens of other top 10 chart positions globally, Soulshaker have once again delivered one of their trademark offerings perfect for those feel good dance-floors.

**#LucaDebonaire** is a constant fixture of late in the World's Top 10 Artists Chart at Beatport and Traxsource. Luca is certainly one of the most sought after house producers in the world today.

**#AndyGalea** - Andy's productions have received unwavering support from Radio 1, Pete Tong and Andi Durrant of Capital FM.

**#AJourneyByDJ** a new and mysterious guise bringing a mixture of soulful house and underground house.

With outstanding work from the **#Audiofreaks** team the single remix package has been licensed to 4 international labels and looks set to be the summer smash hit of 2020.

# KayJay

**KayJay** may look and sound familiar. In fact, you've probably seen and heard her a fair few times before without even realising it.

**KayJay** is currently featured lead vocalist with iconic 80's Soul / Disco group **Odyssey**, working with original member **Steven Collazo** (son of original lead singer the late **Lillian Lopez**), **Odyssey** tours regularly headlining many theatres and festivals across the world.

**KayJay** is also the voice behind many a dance smash, such as **Seamus Haji's No.13** chart hit '**Last Night A DJ Saved My Life**', '**Feel The Music**' by **K-Klass** the **Hoxton Whores** '**Friday, Saturday Love**', '**Pumpin' It Up**' by **House Addicts**, '**Shake It**' by **Pinups**, '**When I Think Of You**' the **Janet Jackson** remake by **Playhard**, '**Save Your Soul**' by **Leonid Rudenko & Danny Kirsch**, '**Need You Tonight**' by **SW14** and **Vincent Stormfield's** remake of **The Beloved's** '**Sweet Harmony**'.

'**Session Singer to the Stars**', **KayJay** started her career as a backing vocalist with all your favourite Artists; **Jamiroquai**, **Lemar**, **Stereophonics**, **Lee** **John's Imagination**, **Alexander O'Neal**, **Rose Royce**, **Lisa Stansfield**, **Shola Ama**, **Westlife**, **Roni Size**, **Estelle**, **Martha Reeves** amongst many others - when live music on television was at its peak....

**KayJay** is a musical force to be reckoned with and is now finally stepping into the well-deserved spotlight as a solo Artist in her own right; dynamic and sultry she's really come into her own with her debut solo single '**Natural High**' taken from the self-penned debut Album '**Intuition**' also due for release soon. The Album features an eclectic and slick array of Soul, Acid Jazz, RnB and funky pop tracks which are surprisingly slick for a self-funded, DIY independent Artist.

**KayJay** is carving out a niche as a classic Artist of the future and her warmth and authenticity are a refreshing change from all the hard and rather linear electronic sounds currently dominating the pop charts. **KayJay** is an up-front, sincere and genuinely likeable artist, she's not trying to be something she's not. Her down to earth attitude is very appealing and seems to fill a void lacking in the current UK music scene, she is keeping it real, breathing some life and soul back into your playlists and is indeed 'taking it back to music'.

This lady's star is rising fast....
